

(1) EC-Type Examination Certificate

(2) Council Directive of 21 December 1989 on the approximation of the laws of the member states relating to personal protective equipment - 89/686/EEC

(3) No. of EC-Type Examination Certificate: **ZP/B007/14**

(4) Product: **Anchor device type B**
Type: **ABS RunBeam®**

(5) Manufacturer: **ABS Safety GmbH**

(6) Address: **Gewerbering 3, 47623 Kevelaer**

(7) The design and construction of this personal protective equipment and any acceptable variation thereto are specified in the schedule to this type examination certificate.

(8) The certification body of DEKRA EXAM GmbH, Notified Body No. 0158 according to Article 9 of Council Directive 89/686/EEC of 21 December 1989, certifies that this personal protective equipment has been found to comply with the Essential Health and Safety Requirements given in Annex II to the Directive. The examination and test results are recorded in the test and assessment report PB 14-012.

(9) The Essential Health and Safety Requirements are assured by compliance with

DIN EN 795:2012

(10) This EC-Type Examination Certificate relates only to the design, examination and tests of the specified personal protective equipment in accordance to Directive 89/686/EEC. Further requirements of the Directive apply to the manufacturing process and supply of this personal protective equipment. These are not covered by this certificate.

(11) When applying the CE Marking to the products that conform to the types examined, the client is obliged to add, in accordance with the attached pattern, the identification number of the Notified Body engaged in production control.

CE 0158

(12) This EC-Type Examination certificate is valid until 2019-01-23.

Anchor device type B
Type: ABS RunBeam®

15.2 Description

The anchor device type: ABS RunBeam® serves as mobile individual anchor point to protect maximum one person against fall from a height and is designed for horizontal use on girders (Figures 1 - 2).

Basically, the anchor device consists of a folded, corrosion-resistant steel body ($t = 4 \text{ mm}$). Bolted to each side of the body are two polyacetal guide rollers each. The anchor device can be mounted to and removed from the building structure by a bolted connection at the guide rollers. The rollers are connected to the body by bolts (M16 x 70 mm), self-locking nuts (M16) and washers ($\text{Ø}17 \text{ mm}$).

The user's personal protective equipment against fall from a height can be attached to the freely anchor point. The device is designed exclusively for overhead use.
