- (15) 15.1 Subject and Type
Anchor device type B und Typ C
Type: ABS ASK 8

15.2 Description

The anchor device of type ABS ASK 8 (Fig. 1) is used for the temporary protection of maximum four people against falls from a height. The anchor device is fastened to the building by a connector attached to the end of the anchor line. Similar connectors of the same type that can move freely are used as intermediate structural anchors. The other end of the anchor line is equipped with a rope adjusting device which is used to tension the rail. At the same time, it is also used as an end stop. The anchor line consists of a core mantle rope (\varnothing 14 mm). The anchor device of type ABS ASK 8 is mounted horizontally. The maximum distance between two end stops is 20 m. The user protects himself against falls from a height by connecting his personal protective equipment to the anchor line of the anchor device. It is not possible to override the end stops of the anchor device. The metallic components of the anchor device are made of corrosion-resistant steel respectively aluminium.
