Roof Edge Protection

certificate number 20161109095 DB

CERTIFICAAT

Manufacturer	:	Roof Safety Systems (RSS)
Type	:	RSS-101 uprights with 3 m fencing
Material	:	Aluminium
Year of Manufacture	:	2016
Standards employed	:	NEN-EN-ISO 13374:2013 classe A, B and C of the Dutch Standardisation Institute (NEN) for strength and the 'Arbobesluit' 3.16 of the Dutch Ministry of Social Affairs and Employment for the construction and strength

On 15 November 2016, Aboma assessed the roof edge protection mentioned above. The assessment was carried out in accordance with NEN-EN-ISO 13374 classe A, B and C of the Dutch Standardisation Institute (NEN) for strength and the 'Arbobesluit' 3.16 of the Dutch Ministry of Social Affairs and Employment for the construction and strength. The assessment showed that the parts belonging to the structure meet the specified standard (see Aboma report number 20161109095).

This certificate is valid up to and including November 2017

General Manager

N.B.: At least once a year, Aboma will carry out a spot check to ensure that the product continues to be in line with the assessed make and type. The manufacture will inform Aboma of any changes after which Aboma will announce whether the certificate remains valid. After far-reaching changes to the product, both the assessment and the test must be carried out again.
