

ABS Comfort

Easy-to-wear safety harness for continuous usage when working high up

Comfortable PPE equipment for continuous usage: Our ABS Comfort safety harness combines reliable protection with a high level of user comfort. Thanks to practical quick release fasteners on the legs and at the chest, you can put on and take off your safety harness at lightning speed. You can attach your connectors to the front or back, as required - depending on the intended usage. There are 2 suspension loops in the chest area; you can also hook up using a D-ring on the back.

PPE Type

Safety harness

Max. no. of users

1 Person

Use the adjustable shoulder and leg straps of our ABS Comfort to individually adjust the harness for a perfect fit. Breathable padding over the shoulders and across the back ensure that the harness is comfortable to wear and prevent the straps from sitting directly on top of items of clothing. Another special feature of this PPE harness: If you hold up the harness by its ring eyelet, it will automatically fall into the correct position - making it easy to put on.

Our ABS Comfort is a true all-rounder, designed for use in climbing, securing and rescue work. Through its extremely lightweight design, you will not find it unpleasant to wear even if you have to work in it for longer periods of time. This ABS Safety harness is certified in accordance with EN 361:2002.

- EN 361:2002
- Shoulder and back padding
- Practical quick release fasteners for putting on and taking of the harness quickly
