

ABS Mobile Work Platform

2 individuals | max. working height 11.50 m

Application

Access technology

Max. no. of users

2 Persons

Mobile Work Platforms manufactured by ABS Safety combine flexibility, safety and user-friendliness in one innovative system. All our models comply with EN 1004-1 and ensure maximum safety when working high-up thanks to their system-integrated, all-round side protection features. There is a broad range of platform models to choose from - all of which have been specially designed to accommodate different requirements and comply with varying space confinements:

- **Wide 650/950:** This model has a spacious platform (dimensions: 1.80 x 1.20 m) and allows the user to work at a height of up to 11.50 m, ideal for large-scale projects
- **Narrow 650/950:** Perfect for confined spaces (the platform itself measures 1.80 x 0.60 m) - with the same load capacity
- **Pro 650/1070:** This platform measures 1.80 x 1.20 m. In addition, built-in steps allow you to easily transport materials and tools.

Thanks to their height-adjustable swivel castors and telescope-design outriggers, all our models offer maximum mobility and stability. Our Work Platforms are suitable for a broad range of applications - both indoors and out. They have a load capacity of up to 200 kg/m² (load class 3) - making them particularly robust and reliable.

The space-saving design of all our models means that each one can be packed onto a single pallet - making the logistics considerably easier to handle. Whether you work in the trading, maintenance or construction sector, ABS Mobile Work Platforms are the perfect choice, if you are looking for an efficient solution that keeps you safe when working high-up.

- EN 1004-1
- System-integrated, all-round side protection system ensures maximum safety
- Load class 3, capable of bearing loads of up to 200 kg/m²
- Equipped with height-adjustable swivel castors and parking brakes
- Telescope-design outriggers ensure stability
- Easy to transport and can be stored on a pallet
