

ABS SkyRoll

Aluminium roller glider for overhead fall protection systems

Our ABS SkyRoll roller glider is manufactured from highly-durable aluminium material with stainless steel, ball bearing-mounted rollers that allow it to glide extremely smoothly along our overhead-mounted, stainless steel ABS-Lock SYS II (8 mm) and ABS-Lock SYS IV (6 mm) lifeline systems.

This roller glider masters curves effortlessly and is designed to secure 1 individual according to EN 795:2012, C. The whole ABS lifeline system can be used by up to 4 workers simultaneously, whereby each user requires his/her own glider. Our ABS SkyRoll glider is suitable for overhead-mounted lifeline systems attached to ceilings and facades.

- General national technical approval (German: "abZ"): Z-14.9-786
- EN 795:2012, C
- Ideal for overhead usage
- Made of highly-durable aluminium material
- Extremely smooth-running stainless steel rollers
