

ABS Window Cleaner Kit

PPE kit for window cleaners - includes a safety harness, a lanyard with energy absorber and a protective bag

Did you know: From the first floor up, your employees must be protected from falling when cleaning windows. This means that building owners must ensure that safety systems are installed in the vicinity of windows. In order to be able to use an existing safety system, your cleaning and maintenance personnel requires the right equipment. One of our special PPE kits - the ABS Window Cleaner Kit - contains all the personal fall protection equipment you need.

This Window Cleaner Kit consists of an ABS Comfort safety harness, a 2 m lanyard with an integrated energy absorber and a black protective bag.
